

July 28, 1955.

Mr. Emil C. Gradert
Superintendent of Water Dist. No. 4
Fort Bridger, Wyoming.

RE: Burnt Fork Distribution

Dear Sir:

Reference is made to recent correspondence relative to the payment of expenses in connection with the distribution of water on Burnt Fork, an interstate stream and a tributary of the Green River.

Enclosed are three copies of an agreement between Mr. Louis Stoll and the State Engineer of Utah covering Utah's share of the costs of distribution for the months of June, July and August 1955. Please have Mr. Stoll sign all three copies and return two copies to me.

Enclosed also are two vouchers covering payment to Mr. Stoll, one for \$120.00 for June and July and one for \$60.00 covering the month of August. You and Mr. Stoll should sign the vouchers in the space provided and forward same to this office at the end of the period covered.

Delay in this matter has been due to the difficulty of financing the operation. In Utah, distribution costs are assessed against the water users.

In order to complete our records it is requested that this office be furnished a record of the distribution of water during the season.

It is understood that the total cost of this operation for 1955 will be \$600.00 of which Utah will pay \$180.00 and Wyoming \$420.00 all in accordance with the Upper Colorado River Basin Compact of 1948.

Very truly yours,

Joseph M. Tracy
STATE ENGINEER.
